Three is authorised to resell the Security Application as Three Device Security under licence from Bitdefender, a company registered in Romania whose registered office is at 15A Orhideelor St.Orhideea Towers, District 6 Bucharest 060071 Romania.

What functionality is included in the Security Application?

The Security Application provides enriched protection for your smartphone or tablet when browsing online by improving your account privacy, web protection, and presenting scam alerts. The Security Application scans webpages to warn you if you’ve come across fraudulent pages or online threats, giving you increased confidence that your device and data is being protected when you’re online.

The Security Application provides different features for Android and iOS devices, please see below what functionality is available with your device.

The following features are available for Android devices:

- **App Anomaly Detection** – provides you with an extra later of security to protect against potentially malicious apps as soon as they exhibit abnormal behaviour.
- **Malware Scanner** – provides you with in-depth information about the type of malware threats you’re protected against.
- **On-Demand & On-Install Scan** – scans your device to ensure all apps are clean and automatically scans newly installed apps using an antivirus module.
- **Web Protection** – scans webpages and warns you when you come across fraudulent pages and other online threats.
- **Anti-theft** – allows you to remotely lock, wipe, or send a message to your device in case of loss or theft. It also enables you to take a photo of anyone who tries to tamper with your device in your absence.
- **App Lock** – provides greater protection for sensitive apps by enabling you to lock them with a PIN code.
- **Account Privacy** – enables you to check if your online accounts have been involved in any data breaches, notifies you when sensitive data is at risk and suggests solutions.

The following features are available for iOS devices:

- **Web Protection** - scans webpages and warns you when you come across fraudulent pages and other online threats.
- **Device Scan** – protects your device and its data by detecting security misconfigurations and helping you remediate them.
- **Scam Alert & Calendar Protection** – provides you with protection against phishing scams delivered through calendar invites and SMS messages from unknown sources.
- **Account Privacy** – enables you to check if your online accounts have been involved in any data breaches, notifies you when sensitive data is at risk and suggests solutions.
